Revolution Recording Chooses Xilica DSP to Process Control Room Monitor Speakers

Revolution Recording, a new three studio recording studio complex in downtown Toronto Canada, has chosen Xilica XP Series digital processors to process the large format 4 way & 3 way monitor speakers in each of the three control rooms. Both stereo and 5.1 surround configurations.

Revolution Recording owner Joe Dunphy comments, "We're all about details at Revolution, and the Xilica digital processors sound fantastic while giving us the fine control we need in our recording studio playback system's."
